

ANTIGRAVITY LITHIUM BATTERIES

www.AntigravityBatteries.com | info@antigravitybatteries.com | 310 527 2330

Since 2010 Antigravity Batteries has been a Leader/Innovator in Lithium-Ion Motorsports Batteries and related products. Our MICRO-START mini jump-starter was the first of its kind and started an entire new category, and with our new RE-START Batteries we are bringing the next generation battery forward. From World-Class Racing, to Daily Drivers, to fun and functional Lithium-Ion products we have you covered. We also offer a complete line of accessories and chargers for our batteries. Feel free to visit our website or contact us with any questions.

ANTIGRAVITY BATTERIES

LITHIUM-ION POWERSPORTS BATTERIES

THE ONLY BATTERY THAT WON'T LEAVE YOU STRANDED

MEET THE FUTURE OF BATTERIES

The FIRST battery with BUILT-IN JUMP STARTING

FOR EVERYDAY RIDERS TO WORLDCLASS RACERS

WHY ANTIGRAVITY LITHIUM-ION BATTERIES?

Antigravity Batteries Lithium-Ion Batteries offer a 70% weight reduction over Lead/Acid Batteries while providing up to 2X the Cranking Power. Just changing to our battery in a Performance/Race Car can save up to 35 pounds instantly, or 10 pounds in a Motorcycle. Such significant weight-loss results in better starting, improved handling, shorter braking distances, better acceleration and less unsprung weight.

Additionally, our Lithium-Ion Batteries are by far the most cost effective weightloss product you can buy; to lose even 10 pounds of weight in Carbon Fiber is over \$10,000 dollars - comparatively for a few hundred dollars you can drop from 10 to 35 pounds! Combine that with a longer service life and no toxic lead or acid, and the Antigravity Batteries Lithium-Ion Technology is a winner at every level!

ANTIGRAVITY BATTERIES

NEW

1 NEW! RE-START

Our new line of RE-START (RS) batteries is the World's First powersports battery to intelligently monitor voltage and offer **BUILT-IN JUMP STARTING**. It will put itself to sleep before it's drained dead, yet amazingly saves just enough reserve energy so you can RE-START your vehicle. Simply press the button on top, start your vehicle and drive away. (Remote Re-Start Button soon available.) No cables or assistance needed. The new RS batteries also feature a full Battery Management System (BMS) onboard with real-time lithium cell balancing, and over-discharge and thermal protections.

10 MODELS starting from \$129.99

HEAVY DUTY (HD) HI-POWER NON-RESTART VERSIONS AVAILABLE.

2 SMALL CASE

The Small Case models are the smallest and lightest format from any manufacturer. Our tiny AG-401 is only 1.25" thick and 12 oz. yet capable of starting 1200cc Race bikes. Our AG-1601, with a stunning 480 Cranking Amps, weighs just 3 lbs but can easily start 5.7L V8 Motors or V-Twin Custom Bikes. **VERSATILITY, SIZE and POWER** make these the choice for **Performance/Race Vehicles and Custom Bike Builders**.

4 MODELS starting from \$119.99

3 EXTREME POWER

Our Extreme Power Series (XPS) models offer the most power possible for Cranking but in the Smallest package possible. They are mainly for **Race Applications, or Custom Motorcycles** such as Large V-Twins when a very compact, hi-power battery is desired to start a large motor. Offering the most Cranking Power in the most compact size possible, our XPS batteries will get your **HI-PERFORMANCE** vehicle started easily and dramatically reduce weight as well.

4 MODELS starting from \$119.99

4 SPECIAL VOLTAGE

Our "Special Voltage" models are made specifically for two special classes of vehicles: 6-Volt for **VINTAGE OWNERS**, and 16-Volt for hardcore **RACERS**. The 6-Volt models come in two sizes (Small Case Formats) to meet the needs of vintage bike and some Vintage Car owners. The 16-Volt size comes in a 500 Amp OEM Case format that only weighs 4 pounds!
