

MICRO-START

XP-1 JUMP STARTER
PERSONAL POWER SUPPLY

ANTIGRAVITY BATTERIES

The XP-1 was winner of the SEMA New Products Award in 2013, it was the first and ORIGINAL mini jump starter, and considered the industry standard in its class. The newly RE-DESIGNED XP-1 is even better than the original best seller. We added an additional USB port (2 total) and upgraded the Smart and Safe Clamps with thermal protection for the ultimate in safety and functionality. The XP-1 has EXTREME power and UL-listed battery cells and can easily start V8 vehicles up 30 times in a row** on one charge including Motorcycles, Cars, and Trucks with up to 6.0 liter gas engine sizes.

The XP-1 has a robust 12,000 mAh of back-up power and offers 4 power ports to charge most any electronic you have including 19V Laptops, 12V devices and any USB devices such as Cell phones, Tablets, GoPro Cameras, and Bluetooth devices. It also has a very bright built-in LED flashlight with SOS patterns to assist in lighting your way in the dark.

The XP-1 is still small enough to fit in your pocket, purse or backpack and comes in a compact leatherette carry case with everything needed to start your vehicle, and charge all of your electronics. Just charge the XP-1 and take safe, portable power where your active lifestyle takes you.

** Not intended for Diesel Motors larger than 3.5 liters. Please use the XP-10 for Diesel Vehicles up to 7.3 liters **

MSRP \$149.99

The SPORT is super sleek & small. It Jump-Starts vehicles with up to V6 motors in size and also charges any USB devices. It comes in our smallest carry case.	The XP-3 easily jump-starts vehicles up to 5.7 liter V8 in motor size. It has 2 USB ports for extra charging capabilities. XP-3 is a little bigger than the SPORT model.	The XP-1 does it all: it easily starts vehicles up to 6L V8 in motor size while having the ability to charge and power 19V Laptop Computers, 12V Devices and any USB Device.	The XP-10 PPS does it all and with authority! It can start Diesel Motors up to 7.3 liters and gas engines with ease. Charge Laptop Computers, 12V Devices and any USB Device.	The new model XP-10-HD is a Heavy Duty Micro-Start perfect for mechanics, fleets and large vehicles. More power. Includes the much larger, unbreakable all-copper Smart Clamps.
